Roberto J. Torres  
Senior Health Physicist  
U.S. Nuclear Regulatory Commission, Region IV  
Division of Nuclear Materials Safety  
Nuclear Materials Safety, Branch B  
612 East Lamar Boulevard, Suite 400  
Arlington, Texas 76011-4125

Re: Amendment to License 25-29318-01

Dear Mr. Torres:

We are requesting that our license be amended. We would like to amend Condition 8A of our license to reflect the possession of an additional C300 density gauge, Serial# 21026, which is currently licensed by Helena Sand and Gravel of Helena, MT. We are also sending our older C200 density gauge back to Seaman Nuclear for disposal.

Thank you for your help and attention in this matter.

Sincerely,

Rob Koelzer  
Schellinger Construction

You can go ahead and remove the C200. We have no intention of getting another C200. It is older technology.

Thanks,

Rob

Just for clarification purposes. Do you want me to remove the authorization from your license for the Seaman C-200 or do you want me to leave this authorization in your license in the event that you get another C-200?

If this is the case then I need copy of the most recent leak test so I can remove it from the license.  
Thank you.

## Leak Test Certificate

February 18, 2010

A leak test has been performed on meter, serial number **L282**, a model C-200, containing the radionuclide Ra 226.

Owned By: Schellinger Construction  
PO Box 39  
Columbia Falls, MT 59912

**RECEIVED**

MAY 07 2010

Date Sample Collected: 2/15/10

Collected By: Rob K.

**DNMS**

Date Sample Analyzed: 2/18/10

Analyzed By: T. Lindemann

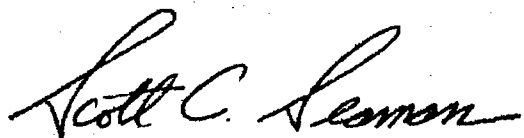

Most regulatory agencies consider a source to be leaking if a leak test reveals the presence of more than 0.005 microcurie of removable contamination.

Analysis found contamination of less than 0.005 microcurie.

Analysis authorized by Wisconsin license 079-1257-01.
