SENIOR DIRECTOR
USED FUEL MANAGEMENT

May 21, 2010

Mr. Michael Weber
Deputy Executive Director for Materials, Waste,
Research, State, Tribal, and Compliance Programs
U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001

Dear Mike:

On behalf of the Nuclear Energy Institute, I want to thank you for your leadership and participation representing the Nuclear Regulatory Commission at the 2010 Dry Fuel Storage Information Forum in Baltimore, Maryland. Your discussion on "NRC's Integrated Strategy for Spent Fuel Management" was insightful and informative while outlining some of the challenges facing the NRC.

The industry recognizes and respects the work you and your staff are doing in successfully regulating dry storage and transportation of used fuel. Your staff should be commended for their dedication to resolving technical issues and improving regulatory efficiency.

We look forward to continuing to work with you and your staff in resolving the regulatory issues of interest to all used fuel storage and transportation stakeholders. We also look forward to working with you and your staff during the implementation of the NRC's integrated strategy.

Thank you for your contribution to making the Forum a success.

Sincerely,

Steven P. Kraft
