Subject: Environmental Protection Agency, Request for Additional Information Concerning a Administrative License Amendment, Control 144645

Dear Mr. Kirby,

This is in reference to phone call dated June 1 requesting for total possession limits associated with Nuclear Regulatory Commission License No. 01-07317-01. As requested, I have followed the telephone conversion with an electronic mail. All NRC licenses are now required to have the total possession limits listed on the license. In order to administratively amend the license, we need the following additional information:

- 1) Please state the total amount of material in activity you would like to be licensed for Cobalt 60, sealed sources which is item 8.C. on the license.
- 2) Please state the total amount of material in activity you would like to be licensed for Nickel 63, foil or placed sources which is item 8.D. on the license.
- 3) Please state the total amount of material in activity you would like to be licensed for any source material which is item 8.F. on the license.

Please consider the amount of material being used, stored, on hand before disposal, and any future expansion. Also, you have stated for item 8.F. on your Certification of Financial Assurance, the amount of 10 millicuries. If you desire a different amount, then you will need to submit another Certification of Financial Assurance to reflect this changed amount.

We will continue our review upon receipt of this information. Please reply to my attention at the Region 1 Office and refer to Mail Control No. 144645. If you have technical questions regarding this letter, please call me at (610) 337-5366.

Please note that you may reply to this letter by return e-mail. Your reply may also reply by letter or facsimile (610-337-5269).

Thank You,

Dennis Lawyer
