2443 Warrenville Road
Lisle, Illinois 60532-4352

FROM: Mr. Jack Crawford
Radiation Safety Officer / Assistant Director
Environmental Health & Safety
University of Missouri – Columbia
Columbia, MO 65211-3050

DATE: May 26th, 2010

SUBJECT: Additional information to control number 318752 and request for amendment No. 106 to University of Missouri-Columbia Broad Scope License No. 24-00513-32, Docket No. 030-02278.

Dear Colleen:

The purpose of this letter is to request that the NRC Radioactive Materials License (RML) 24-00513-32 (current amendment No. 105) issued to the Curators of the University of Missouri-Columbia be amended to include the following changes to license sub item No. 8. C. as was proposed in NRC letter dated April 15th, 2010 which transmitted amendment No. 105 to us.

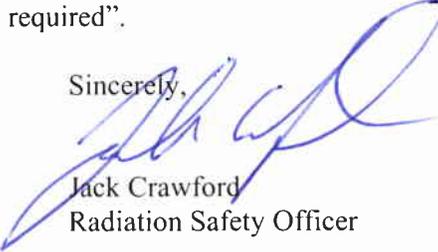

Specifically the University of Missouri-Columbia request that RML No. 24-00513-32 be amended to revise the following;

Revise

1. Under line item C. "Any byproduct material permitted by 10 CFR 35.300";
Column 8. - ***"Possession limit not to exceed 4 curies of each radionuclide with total possession limit of 6 curies"***

We have based our request for these individual and combined possession limits upon our current history of use as well as to allow growth of the human use of medical isotopes for 10 CFR 35.300 –"Use of unsealed byproduct material for which a written directive is required".

Sincerely,

Jack Crawford
Radiation Safety Officer
