

June 14, 2010

LICENSEE: Tennessee Valley Authority

FACILITY: Watts Bar Nuclear Power Plant, Unit 2

SUBJECT: SUMMARY OF MAY 11, 2010, MEETING WITH TENNESSEE VALLEY  
AUTHORITY REGARDING WATTS BAR UNIT 2 FIRE PROTECTION AND  
INSTRUMENTATION AND CONTROL SUBMITTALS

On May 11, 2010, a meeting was held between the U.S. Nuclear Regulatory Commission (NRC) and representatives of Tennessee Valley Authority (TVA, the applicant), at NRC Headquarters, One White Flint North, 11555 Rockville Pike, Rockville, Maryland. The purpose of the meeting was to discuss the scope and timing of the Watts Bar Unit 2 fire protection plan and instrumentation and control and submittals.

The enclosure contains the list of attendees. The applicant's presentation provided historical information regarding the Watts Bar Nuclear Power Plant, Units 1 and 2, fire protection plan licensing activities and a summary of program changes since 2001 (see NRC Agencywide Documents Access and Management System Accession No. ML101170102). The staff queried the applicant regarding the timing of the submittal in relation to the current Watts Bar Unit 2 licensing schedule. The applicant informed the NRC that a schedule will be developed and provided to the NRC. The applicant inquired about the acceptability of providing partial submittals for review, such as those portions that are not likely to change as the Unit 2 information is incorporated into the plan and the acceptability of providing as-designed information promptly and providing as-built information as it becomes available. The NRC staff agreed that partial and as-designed information submittals are acceptable to begin the review as long as the submittals are updated and the updates clearly identify what information is being changed.

The applicant also discussed the scope and timing of submittals related to the instrumentation and control areas. This portion of the meeting was closed to the public because proprietary information was discussed.

A member of the public was in attendance. Public meeting feedback forms were not received.
