Subject: RE: Question on License Application Completeness

Steve:

The application will not be deemed incomplete solely due to 6 months of missing data. However, the remaining 6 months of data must be submitted to the staff during the technical review and must be done so through an application amendment. Then the staff's technical review can continue and the data can be appropriately incorporated. Please discuss the need for the new monitor and the commitment to submit the data once it is available in the application.

Steve

Subject: Question on License Application Completeness

Stephen - per your suggestion the other day as followup to our conversation , I pose the following question:

Mid way through the 12 month environmental data collection program, an applicant determines it appropriate to install another air particulate sampler - would the application be deemed "incomplete" without the full 12 months of data for that location ?
advise - steve
