Washington, DC 20037

SUBJECT: COMMISSIONER WILLIAM MAGWOOD'S VISIT TO THE GEORGE
WASHINGTON UNIVERSITY

Dear Dr. Hirshfield:

I would like to express my appreciation to you and to your staff for arranging a very informative visit to the George Washington University self-shielded irradiator facility for Commissioner Magwood and his staff. As you may be aware, the Commission is considering a National Research Council recommendation to phase out the use of cesium-137 chloride in the United States due to the potential risk to public health and safety in the event cesium-137 chloride is involved in an accident or an attack. The information provided to the Commissioner by Ali Ramezani, Ph.D. included the importance of self-shielded irradiators containing cesium-137 chloride to medical research. Dr. Ramezani's efforts will allow the Commissioner to make a more informed decision when responding to the National Research Council's recommendation. Dan Hibbing deserves our special thanks for making all of the arrangements for the Commissioner's visit – all completed with less than 24 hours notice – and for addressing many of the Commissioner's questions.

Thank you again for your cooperation.

Sincerely,
