Subject: RB Evac. Alarm Usage

Russ...this is the list I came up with based on searching EDMS for directed use of the RB Evac. alarm.

The following procedures direct use of the RB evac. Alarm:

- OP-TM-AOP-001, Fire, step 3.15
- OP-TM-MAP-C0101, Radiation Level HI, step 4.7
- OP-TM-EOP-030, Loss of Decay Heat Removal, step 3.3
- OS-24, Conduct of Operations During Abnormal and Emergency Events, step 4.4.5

The following procedures direct personnel to exit RB without use of alarm:

- OP-TM-AOP-050, Reactor Coolant Leakage, step 7.1

- CONCRETE mockup.
