

June 14, 2010

MEMORANDUM TO: Donnie Harrison, Chief
Probabilistic Risk Assessment Licensing Branch
Division of Risk Assessment
Office of Nuclear Reactor Regulation

FROM: Andrew J. Howe, Sr. Reliability and Risk Analyst */RA/*
Probabilistic Risk Assessment Licensing Branch
Division of Risk Assessment
Office of Nuclear Reactor Regulation

SUBJECT: SUMMARY OF JUNE 3, 2010 CATEGORY 2 PUBLIC MEETING WITH
NUCLEAR ENERGY INSTITUTE AND INDUSTRY REPRESENTATIVES
TO DISCUSS APPLICATION OF REGULATORY GUIDE 1.200
REVISION 2 TO RISK-INFORMED LICENSING ACTIONS

On June 3, 2010, the Nuclear Regulatory Commission (NRC) staff held a public meeting with members of the Nuclear Energy Institute (NEI) to discuss issues associated with the application of Regulatory Guide 1.200 Revision 2 for various risk-informed licensing actions. Enclosure 1 lists the meeting attendees.

A public meeting notice was issued on May 12, 2010, and was posted on the NRC's external (public) web page (Agencywide Document Access Management System (ADAMS) Accession No. ML101330454). The meeting opened with a brief discussion by NRC staff of the current guidance for risk-informed applications regarding the scope of hazards required to be addressed for risk-informed licensing actions, and the relationship of Regulatory Guide 1.200 Revision 2 and endorsed standards for probabilistic risk assessments (PRA). Following this introduction, an open discussion was held with members of the NRC staff, NEI, and industry representatives. The following topics were discussed:

- Risk-informed Technical Specification Initiative 4B (program for risk-informed completion times) and potential for additional pilot plant activities (including fee waivers)
- Risk-informed Technical Specification Initiative 5B (program for risk-informed surveillance frequencies)
- Risk-informed Technical Specification Initiatives 4A (extensions of single completion times)
- Risk-informed Technical Specification Initiative 7 (hazard barriers)
