Your Film ~ "Waste: The Nuclear Nightmare"

Sunday, May 23, 2010 4:09 PM

Dear Mr. Gueret and Bonne Pioche,
communication@bonnepioche.fr

RE: Waste: The Nuclear Nightmare --Kudos! Great film! Well done! Thank you! VHS tapes? DVDs?

Dear Monsieur Gueret and Bonne Pioche Associates,

We write to you regarding our community which lies next to Diablo Canyon Nuclear Power Plant on the Centri *believe*, pro-nuclear "judges", as to whether or not to renew (fourteen years early) the licenses in 2024-5 for an country and planet, is merely a well paid handmaiden, nationally as well, for nuclear energy proponents and " NEEDED ~ and pays enough taxes here to attempt to "buy off " a substantial sector of the local population, fr

The group to whom we owe this *last chance* suit in hopes of stopping the powerful PG&E juggernaut and the o *Mothers For Peace*, a group which has opposed the plant from the beginnings 40 years ago, and led by Jane Sw

Pacific Gas and Electric (PG&E), the utility that owns the plant, has budgeted eighty-five million dollars of rat the public into thinking that nuclear energy is "cheap, clean and safe"-- none of which applies in truth --as you

In addition, and as a separate offense against the public interest by PG&E using ratepayer dollars ~ the only n half million dollars to buy the needed enabling signatures and another 32.5 million to pay for scandalously *mis* majority vote in a plebiscite in order simply to enter the energy marketplace.

In less than two weeks, this "bad old days" fascist dictatorship style "enabling law" will be voted upon, in a PR serving ballot measure because of the historically low turnout experienced at this earlier election time, and the campaign against virtually nonexistent opposition, are simply NAUSEATING, and a DISGRACE to our demo

We also suspect they may be working quietly behind the "curtains" to defeat incumbent Supervisor Gibson in earthquake situation more thoroughly before proceeding, an inquiry they seem greatly to fear, along with any were gaining approval to build these twin mistakes!

What contempt they show for us! What contempt we should feel for this arrogant, evil corporation, "too big fo CosaNukera NukeCrook monopoly proponents. Witness the judges in this current hearing who have all spent in this very matter, Winston & Strawn. How cozy.

"Our" plant lies a mile from an offshore fault line with eleven others nearby. Our area has suffered tsunamis i devastating earthquake and for a record tsunami at or above any experienced in recorded times. We are indee approximate *net* of ten (they claim 20) percent of our electricity, all of which has gone to subsidise a wasteful, t immigration, that we don't want or need. In every sense it is time to "grow up" and to put away childish things!

We would like to get your film into our local movie theater, The Palm Theater, which runs films such as yours, and reclaiming our county before it is entirely ruined.

PROBLEM: we can't find that your film is on VHS or DVD yet and that being the case, how to get it here and plant altogether as being unsafe technology for the planet. President Obama, who was elected as anti-war and

Indeed. he has announced the US will renew its push to build more nuclear power plants-- we can only believe !?! We suspect this decade premature application to renew these licenses until 2044 and 2045 and beyond the | their lawful entitlement to peaceful nuclear power, however unwisely, while still others possess a secret arsenal have led us too long.

But they may have overplayed there hand seriously, and made a grave error strategically with his ill conceived evening for an hour and a half! The SLO Mothers For Peace MUST tell their attorney about this marvelous n Safety Committee or the similarly inclined Nuclear Regulatory Charade!

At least they should ATTEMPT to introduce some expert testimony and info from him. He can speak with equ

and knowledge as to the threat, and has a great deal of professional local insider knowledge gleaned over many from which they will ultimately have to back down. And, If they hear him, I guarantee that these reactors will licensed now, and is not safe to extend for 20 years past 2024/25, then it is not safe to operate UNTIL THEN. A

AND, these Devil Canyon evil twins are the loose yarn ends that will unravel the whole hideous garment of nuclear extension will prove to have been a HUGE mistake, and a HUGE opportunity! But, I digress.

Could you PLEASE help us learn how to get your wonderful film into our community? Thank you monsieur

Sincerely, Joe and Merry Boysen

THREE SAMURAI PROFILES: RONIN FOR THE BARONS OF THE NUCLEAR INDUSTRIA

Alex S. Karlin

B.A., Grinnell College (1971)

J.D., Washington University School of Law (1974)

Judge Karlin was appointed as a full-time legal member of the panel in the spring of 2004. Before his appointn

and contractual matters. Between 1988 and 1997, he was of counsel in the environmental section of Morgan, L Karlin also served as an attorney/advisor in the Enforcement Division of the U.S. Environmental Protection Agency. He started his career as a litigator in Dubuque, Iowa, with the law firm of O'Connor, Thomas, Wright, Hamm, and numerous articles and taught professional workshops and classes in environmental law.

Nicholas G. Trikouros

B.S., Fordham University (1969)
M.S., New York University (1972)
Eng., Polytechnic University (1986)

Judge Trikouros currently is a full-time technical member of the Panel, having served previously as a part-time member of the Panel. He is currently a member of the Panel at Trikouros Technologies, a professional consulting company involved in nuclear plant design, licensing, and safety analysis. His expertise include nuclear plant design basis and licensing, reactor systems, emergency operating procedures, and safety analysis. Judge Trikouros provided onsite technical support during the Three Mile Island, Unit 2 accident and participated extensively in graduate instruction on nuclear energy technology as well as on a variety of nuclear industry groups and committees. He has worked for once-through steam generator testing, and the EPRI Utility Steering Committee's Analysis and Testing Subcommittee. He is currently a consultant to the Department of Energy's International Nuclear Safety Program in Ukraine.

(Very appropriate, because we probably have a Ukrainian Incident in our future!)

Paul B. Abramson

B.S., Engineering Mechanics, Lehigh University (1961)
Ph.D., Physics, University of Colorado (1968)
J.D., cum laude, Loyola University Chicago (1984)

Judge Abramson, who can serve as a Legal Judge or a Technical Judge, served as the Panel's Special Associate. He practiced corporate and finance law as a partner in the law firm of Orrick, Herrington & Sutcliffe. He worked on telecommunications project development, construction, and financing and was elected internationally by his peers. In his practice of law, Dr. Abramson was the head of LWR Systems Safety Analysis at Argonne National Laboratory during the accident at Three Mile Island (for the NSAC at EPRI). After receipt of his Ph.D., he was an NSF Postdoctoral Fellow on SNAP 2 (Space Nuclear Auxiliary Power) system design and testing and on the fuel delivery system for liquid metal sodium. He is currently a consultant to Allen & Overy, LLP.

For another 43 nauseating Samurai Biographies ~ so many seemingly near lifetime public trough feeders who are "henhouse" ~ including two vixen ~ go the following link, if you think you can take it. These US Nuclear Regulators serve, along with their own selfish need for perks, power, prestige and easy money.

All seem to be plump, pious and prosperous grandchildren of New Deal fascism now metastasized into a hideous near past ~ both my grandparents and my parents ~ the style of these worthies is to "book a room and talk a

Abstract

Approximately, 1996, Unocal historian Darwin Sainz mentioned the newly built Union Oil "Oilport" refinery in what is now Shell Beach (between Pismo & Avila Beaches and at 50 to 100 feet elevation) was destroyed by a tsunami in the early 1900's. July 2009, George Plafker reported, "a bigger earthquake and a more destructive tsunami than the 1964 event are possible in the future". The 1812 Santa Barbara Channel earthquake produced 5 tsunami waves approximately 50 feet in height to the front of the Santa Barbara Presidio based on a Franciscan Father's journal. A book on "Shipwrecks, Smugglers, and Maritime Mysteries" by Wheeler & Kallman reports the largest wave was 48-50 feet estimated by the USGS west of Santa Barbara near Goleta. The "History of San Luis Obispo County, California" by Thompson & West (1883) reports 12 feet tsunamis occurred on August 13, 1868 (Peruvian earthquake) and April 16, 1877. On November 22, 1878, turbulent water in the absence of wind produced tsunamis that broke over the Morro Bay sand spit (current quad sheet high elevations 66 to 97 feet N to S), destroyed Avila & Pt. Sal piers, damaging Cayucos pier. A Japanese earthquake resulted in a tsunami at 12:40 PM December 9, 1907, near high tide and in already heavy seas, that stood out from the rest of the storm due to its' enormous height. It wrecked the Ventura pier (12-13-1907, SLO Tribune) and the Oilport pier (12-13-1907, SLO Tribune & 12-6-1976 also 12-14-1907, Santa Maria Times & 12-10-1907 SLO Telegram) at Shell beach and destroyed the Oilport refinery (Darwin Sainz, personal communication). Before 7 AM on November 26, 1913, tsunamis wrecked the Monterey area including waves 10 to 15 feet above the Del Monte wharf. At Seaside, "Immense domes of water and foam shot up above the general height" ... "appearing from here to be higher than the highest sandhills along the shore." (12-2-1913, SLO Tribune) Current quad sheet high elevations are 120 feet. These reports of historic tsunamis represent wave elevations significantly higher than the 1964 Alaska earthquake tsunami that is typically used for emergency planning for tsunami inundation in California. Since it appears 4 much larger tsunamis occurred in the Central Coast area in 1812, 1878, 1907 and 1913; it appears we may have become complacent during this recent period of tsunami quiescence. Emergency planning for Central Coast tsunamis should be anticipating tsunami waves in the 50 to 100 feet elevation range.

**MEDIA WANTING TO INTERVIEW ATTORNEY DIANE CURRAN IN SAN LUIS OBISPO MAY 26 OR MAY 27
SAN LUIS OBISPO MOTHERS FOR PEACE TO ARGUE AGAINST LICENSE RENEWAL FOR DIABLO CANYON NUCLEAR PLANT**

Hazards posed by earthquakes and terrorist attack will dominate oral arguments to be presented by San Luis Obispo Mothers for Peace (MFP) against PG&E's application to extend the life of the Diablo Canyon nuclear plant by an additional 20 years until 2044 and 2045.

SLOMFP Attorney Diane Curran from Washington, D.C. will argue that PG&E has failed to meet five requirements of the Atomic Energy Act:

- PG&E has failed to demonstrate the ability to safely manage the aging plant, which was designed in the 60's, safety equipment at Diablo Canyon.
- PG&E's application lacks information on the seismic risks to Diablo, given that studies of the Shoreline Fault show that the plant is in a high seismic risk area.
- PG&E has failed to address the airborne environmental impacts of a reasonably foreseeable spectrum of spent fuel.
- PG&E has failed to evaluate the environmental impacts of an attack on the Diablo Canyon spent fuel pool due to its design.
- PG&E's application lacks a required discussion of the cost-effectiveness of measures to mitigate the environmental impacts of an attack.

An Atomic Safety and Licensing Board (ASLB) from the Nuclear Regulatory Commission (NRC) will begin the hearing on May 26. Parties – NRC staff, PG&E, and San Luis Obispo Mothers for Peace - will be allowed to address the three-member ASLB. <http://www.slocounty.ca.gov/clerk/BoardofSupervisors.htm>.

SEPARATE CHALLENGE TO DRY CASK STORAGE AWAITS ARGUMENT IN FEDERAL COURT:

San Luis Obispo Mothers for Peace has a separate lawsuit pending in the United States Court of Appeals, Ninth Circuit ("ISFSI" or dry cask storage facility), the NRC should have granted MFP a closed hearing on the adequacy of the NRC's decision even though at a closed hearing only those with the required security clearance would be present. MFP attorney Diane Curran says the NRC's decision is illegal.

MFP also accuses the NRC of unlawfully using secret criteria to deny the possible environmental impacts of an attack on the plant.

The NRC illegally ruled that there was no requirement to do a complete Environmental Impact Statement, claiming it was not required by law.

SLOMFP awaits the scheduling of a hearing on that case by the federal court.

DOCUMENTS AVAILABLE ON-LINE:

NRC news release announcing the oral arguments May 26 in San Luis Obispo are at <http://www.nrc.gov/reading-rm/>

Memorandum and Order with details of the schedule for the oral arguments is at http://adamswebsearch.nrc.gov/scripts/rwisapi.dll/@pip1.env?CQ_SESSION_KEY=HDY CZFEJHXVV&CQ_QUERY=ISFSI

LICENSING BOARD TO HEAR ORAL ARGUMENT MAY 26 IN SAN LUIS OBISPO, CALIFORNIA, ON DIABLO CANYON REACTOR LICENSE RENEWAL

[Printable Version](#) 

The Atomic Safety and Licensing Board handling the Diablo Canyon nuclear reactor license renewal proceeding will hear oral argument May 26 on the request by the San Luis Obispo Mothers for Peace (SLOMFP) for an evidentiary hearing. The Board is an independent quasi-judicial arm of the Nuclear Regulatory Commission that decides legal challenges to applications and proposed licensing actions by the NRC.

The oral argument will be presented by the lawyers representing SLOMFP, Pacific Gas & Electric (PG&E), and NRC staff. The session will begin at 8:30 a.m. PDT and may extend into the evening, if necessary, on Wednesday, May 26 in the San Luis Obispo County Board Chambers of the County Government Center, 1055 Monterey St. in San Luis Obispo. Although the oral argument will be limited to the lawyers for the litigants, the session is open to the public for observation. Early arrival is suggested to allow for security screening for all members of the public interested in attending. NRC policy prohibits signs, banners, posters or displays in the hearing room.

PG&E submitted a license renewal application on Nov. 24, 2009, seeking a 20-year renewal of the operating licenses for Diablo Canyon Power Plant Units 1 and 2. The units are located approximately 12 miles southwest of San Luis Obispo. The Atomic Safety & Licensing Board is considering whether SLOMFP should be granted intervenor status in the proceeding. SLOMFP has submitted contentions challenging five aspects of PG&E's application, along with a request to waive two NRC regulations so as to allow the admission of two of the contentions. All parties have filed extensive legal briefs on these issues. On May 26th the Board will listen to the lawyers' arguments and ask them questions concerning the proposed contentions and waiver requests.

Documents related to the Diablo Canyon license renewal application are available on the NRC Web site at: <http://www.nrc.gov/reactors/operating/licensing/renewal/applications/diablo-canyon.html>. More information about the ASLB can be found at: <http://www.nrc.gov/about-nrc/organization/aslbpfundesc.html>.

NRC news releases are available through a free *listserv* subscription at the following Web address:
<http://www.nrc.gov/public-involve/listserver.html>. The NRC Home Page at www.nrc.gov also offers a Subscribe to News link in the News & Information menu. E-mail notifications are sent to subscribers when news releases are posted to NRC's Web Site.

officers appointed by either the Commission or the Chief Administrative Judge. The Panel, which has no fixed number of positions, is composed of (1) administrative judges (full-time and part-time), who are lawyers, engineers, and scientists and (2) administrative law judges (ALJs) who are lawyers. Administrative judges and ALJs serve as single presiding officers or on three-member boards, which generally are chaired by a lawyer, for a broad range of proceedings.

When Congress enacted the Atomic Energy Act, it expected the Panel's technical judges would be "persons of recognized caliber and stature in the nuclear field." In addition, both legal and technical judges are subject to the conflict of interest laws and regulations applicable to Federal employees and the high ethical standards for Federal judges. They, along with their spouses and minor children, are prohibited from owning any securities issued by nuclear utilities and key components of the nuclear industry. All full-time judges have no employment relationships with any nuclear entity regulated by the NRC. Some part-time technical judges maintain their expertise by working on grants and assignments concerning the study and implementation of cutting-edge science and technology. Some grants and assignments may involve the Department of Energy and participants in the nuclear industry. However, no part-time judge participates in any proceeding that could affect the interests of any party funding the judge's activities. The impartiality of judges is ensured through a multi-layered screening mechanism that ensures no judge participates in a case where a conflict of interest exists or where a judge's impartiality might reasonably be questioned.

Chief Counsel

Anthony C. Eitrem

Provides legal support to the Chief Administrative Judge, administrative judges, boards, and the Panel, and oversees the Panel's law clerks.

[TOP](#)

Licensing Support Network (LSN) Administrator

Daniel J. Graser

Responsible for the design, construction, and operations of (1) the Licensing Support Network (LSN), the electronic, Web-based discovery database for the high-level waste repository licensing proceeding and (2) the Digital Data Management System (DDMS), which will support digital information retrieval, use, and display in a hearing room environment.

[TOP](#)

Program Support and Analysis Staff

Director: Jack G. Whetstine

Provides planning, development, coordination, implementation, and analyses of policies and programs in support of the Panel, including budget; personnel; labor relations; professional services; travel; space and facilities; equipment; contracts; information management, including IT equipment and development; adjudicatory files and services; library facilities; stenographic and clerical services, including field hearing space; equipment management and coordination; meetings; employee training and development; FOIA; security; and safety engineering.

Provides support and services in information management that includes computerized adjudicatory files, management information systems, and other management information applicable to Panel activities.

Manages court reporting contract for all agency offices.

JUDGE KARLIN'S ORDER:

Before Administrative Judges:

Alex S. Karlin, Chairman

Nicholas G. Trikouros

Dr. Paul B. Abramson

In the Matter of

PACIFIC GAS & ELECTRIC COMPANY

(Diablo Canyon Nuclear Power Plant, Units 1
and 2)

ASLBP No. 10-890-01-LR-BD01

May 5, 2010

MEMORANDUM AND ORDER

(Setting Oral Argument)

On May 26, 2010, commencing at 8:30 AM local time the Board will hear oral argument on the petition to intervene and petition for waiver filed by the San Luis Obispo Mothers for Peace (SLOMFP). The oral argument will be held in the San Luis Obispo County Board Chambers of the County Government Center, located at 1055 Monterey St. in San Luis Obispo, California. Only those attorneys who represent SLOMFP, Pacific Gas & Electric Co. (PG&E), and the staff of the Nuclear Regulatory Commission (NRC Staff) and who have entered an appearance pursuant to 10 C.F.R. § 2.314 will be entitled to participate. The Board will extend the oral argument into the evening if necessary.

The oral argument will proceed as follows. First, we will hear a ten-minute opening statement from each participant. Second, the Board will hear argument on the admissibility of each of the contentions. Oral argument concerning the petition for waiver will be combined with the oral argument regarding each of the affected contentions (EC-2 and EC-3). The Board will not entertain oral argument on the standing of the Petitioners. Third, we will entertain a short closing statement, limited to five minutes, from each participant.

For each of the contentions that do not entail a waiver petition (TC-1, EC-1 and EC-4) the Board expects to question SLOMFP for approximately thirty minutes, PG&E for approximately twenty minutes, and the NRC Staff for approximately ten minutes. The Board may permit SLOMFP to reserve up ten minutes for rebuttal.

For each of the contentions that do entail a waiver petition (EC-2 and EC-3), the same rules apply, except that the Board expects to allocate forty minutes to questioning SLOMFP, twenty-five minutes to PG&E, and fifteen minutes to the NRC Staff.

In formulating their arguments, participants should keep in mind that the Board will have read their pleadings. Participants should focus on the critical points in controversy, as those issues have emerged in the pleadings. The main purpose of the oral argument is to allow the Board to clarify its understanding of legal and factual points to assist it in deciding the

issues presented by the pleadings. Thus, the participants should expect that their oral argument will be devoted primarily to responding to questions from the Board. Such questioning is part of, and does not expand, a participant's allotted time.

Given that the sole purpose of this proceeding is to evaluate the admissibility of the contentions, the waiver petition, and the legal issues presented in the participants' pleadings, oral argument will only be heard from the attorneys representing the participants. However, members of the public and representatives of the media are welcome to attend and observe this proceeding. As this is an adjudicatory proceeding, the Board intends to conduct an orderly hearing. Signs, banners, posters, and displays are prohibited in accordance with NRC policy. See Procedures for Providing Security Support for NRC Public Meetings/Hearings, 66 Fed. Reg. 31,719 (June 12, 2001). All interested persons should arrive at least fifteen minutes early so as to allow sufficient time to pass through security screening.

As an informational matter, the participants are advised that the Board is attempting to arrange for the oral argument to be made available for live viewing via an internet webstreaming

- 3 -

feed. As currently planned, the webstreaming feed will be at:

<http://www.slocounty.ca.gov/clerk/BoardofSupervisors.htm>.

Oral limited appearance statements in accord with 10 C.F.R. § 2.315(a) will not be heard at this time. If contentions are ultimately admitted, then the Board may hear oral limited appearance statements regarding those contentions at a later date. In the interim, interested individuals may submit written

It is so ORDERED. limited appearance statements related to the issues in this proceeding. Such written statements may be submitted at any time and should be sent either by (1) mail to the Office of the Secretary, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555-0001, Attention: Rulemakings and Adjudications Staff, with a copy to the Chairman of this Licensing Board at Mail Stop T-3E15, Atomic Safety and Licensing Board Panel, U.S.

Nuclear Regulatory Commission, Washington, D.C. 20555-0001; (2) e-mail to the Office of the Secretary at hearingdocket@nrc.gov, with a copy to this Board (c/o Wen Bu, wen.bu@nrc.gov) or (3) fax to the Office of the Secretary at 301-415-1101 (facsimile verification number: 301-415-1966), with a copy to the Board (c/o Wen Bu) at 301-415-5599 (facsimile verification number: 301-415-7550)
