Mr. Michael F. Weber
Deputy Executive Director for Materials, Waste, Research,
State, Tribal, and Compliance Programs
United States Nuclear Regulatory Commission
Washington, DC 20555-0001

Dear Mr. Weber:

Thank you for taking the time to meet last week, and for providing me with the opportunity to bring you and Ms. Haney up-to-date on USEC's activities. Since our last meeting in January, USEC has made a great deal of progress on the American Centrifuge Plan project. The Department of Energy's support of the tails liability transfer was a positive development, as was the announcement last week of the strategic investment by Toshiba and B&W in USEC. We appreciate the NRC staff's diligent efforts in their timely review of the documents we submitted in support of these two important initiatives. If there is anything my staff can do to help facilitate the NRC's review, please do not hesitate to contact us.

You and your staff have a standing invitation to visit our remarkable testing and manufacturing facilities in Oak Ridge, Tennessee and the American Centrifuge Plant facility in Piketon, Ohio.

In the mean time, we will continue our routine communications with your staff to ensure the NRC is aware of the project's status and remobilization plans to help minimize any potential impact on your resources.

Again, congratulations on your new position.

Sincerely,

John K. Welch
