MEMORANDUM TO Mitzi Young, Assistant General Counsel for
High Level Waste, Fuel Cycle & Nuclear Security

FROM: Lawrence E. Kokajko, Director */RA/*
Division of High-Level Waste Repository Safety
Office of Nuclear Material Safety
and Safeguards

SUBJECT: OGC SUPPORT OF STAFF'S POSITION DURING ORAL
ARGUMENT AND CASE MANAGEMENT CONFERENCE,
JUNE 3 - 4, 2010

On June 3 and June 4, 2010, the Atomic Safety and Licensing Board Panel's Construction Authorization Board 4 heard arguments on the Department of Energy's motion to withdraw its pending license application to construct a geologic repository at Yucca Mountain Nevada, and convened a case management conference to address the potential need to preserve the licensing support network document system. At both events, the position of the United States Nuclear Regulatory Commission (NRC) technical staff was very ably represented by your staff, Ms. Andrea Silvia and Ms. Jessica Bielecki.

In a high-profile case such as this, it is especially important to preserve, to the greatest extent possible, NRC staff's posture as a neutral and independent regulatory authority. Ms. Silvia and Ms. Bielecki represented the NRC staff in just such a manner, with proficiency and dignity. They should be commended for their professionalism, preparation and composure. On behalf of my staff, please convey our sincere appreciation for their hard work, dedication and skilled representation.

cc. Andrea Silvia
Jessica Bielecki
