On June 1, 2010, a Category 1 public meeting was held between the U.S. Nuclear Regulatory Commission (NRC) and representatives of Exelon Generation Company, LLC (EGC, licensee) at NRC Headquarters, One White Flint North, 11555 Rockville Pike, Rockville, Maryland. The purpose of the meeting was to discuss the draft request for additional information (RAI) responses related to license amendment request submitted on October 5, 2009 (Agencywide Documents Access and Management System (ADAMS) Package No. ML092810278), regarding the use of neutron absorbing inserts in the LaSalle county Station (LSCS), Unit 2, spent fuel pool storage racks. The licensee submitted their formal responses to the RAIs on June 10, 2010 (ADAMS Package No. ML101650228). The non-proprietary version can be found in ADAMS (ADAMS Accession No. ML101650229 and ML101650230).

Members of the public were not in attendance. Public Meeting Feedback forms were not received.
