Thanks Dennis. I'm not sure what, if any, new information they are submitting. Pat just left me a voice mail message. She said that the Governor has not signed the application yet but she stated that the plan is to drive it down to HQ the middle of next week (of course, only if it is signed).

Donna:

We previously identified the SUNSI information in the draft application. What new information is there that would be SUNSI? Only the SUNSI information would be redacted from the publicly available version of the application. It would be most helpful if they could flag the pages with the SUNSI information to speed up the review and processing process.

Dennis

ps: When might they submit the application?

Subject: question from Pat Gardner

She said that the application may contain SUNSI and was wondering if they need to mark it as such? My guess would be "yes". She also wanted to know if the document would not be released to the public.

Thanks,
Donna
