Ms Carson,

The tentative schedule had NJ being approved f Sept or Oct 2009 based upon an October 2008 application submittal. NJ's authority would include the slag and baghouse dust material.. Dennis Sollenberger of FSME is handling the application.

Mr. Hayes,

Brooke Poole in OCAA gave me your name. I was interested in finding out a couple of things about the New Jersey application for Agreement State status. Basically, I just wanted to know (1) when more or less would the Agreement State approval occur, if the Staff approves it; and (2) would the Agreement State authority extend to the slag and baghouse dust piles at the Newfield site?

If there's someone else I should ask, please let me know.
Thanks for your help,
Cecilia Carson (OCAA)
