

Daily Notes for October 31, 2008

FSME

*Shieldalloy*

- On October 29, staff participated in a conference call with representatives of the New Jersey (NJ) Bureau of Radiation concerning the decommissioning of the Shieldalloy Metallurgical Corp. site in New Jersey. The representatives from NJ wanted to know if FSME intended to cease its review of the Shieldalloy Decommissioning Plan (DP) now that the NJ Agreement State application has been received. FSME indicated that the review would continue until NJ becomes an Agreement State. The NJ representatives questioned this use of resources given that the staff now anticipates that the NRC's review will not be completed until calendar year 2010 while NJ is scheduled to become an Agreement State in September 2009. The NJ representatives indicated that they may write a letter to the Commission requesting the Commission to direct the staff to cease its review of the Shieldalloy DP.
