RE: Clarification of Scope of Approval for Exempt Distribution (License # 32-23947-01E)

Dear Mr. Jankovich,

GDATP wishes to clarify the scope of approval of our US NRC exempt device registration NR-1280-D-101-E and distribution license 32-23947-01E. Upon reviewing these documents it appears that we may distribute products to any end user as stated under condition 9 of our license and section 10 CFR 30.20 of the regulations. Please confirm in writing that this means we may distribute this product to additional customers beyond our current distribution which includes military, homeland security, law enforcement, and civilian first responders.

If you have any questions regarding this request, please contact Todd Whitaker at (980) 235-2409 or email him at twhitaker@gdatp.com.

Sincerely,

Greg Barton
Director, Operations
Detection Systems
