RE: Control Number 318959

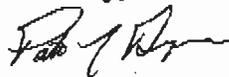

Mr. Macatangay:

Please allow this letter to serve as a response to your request for additional information concerning an amendment request to the materials license of Putnam County Hospital, Number 13-2602802. The additional information is provided in order of your additional information requests in the correspondence dated May 25, 2010.

1. Technetium-99m and Iodine-123 were the only isotopes used at the temporary job sites. At the time of the last use of the temporary job site, Iodine-123 was not regulated by the USNRC.
2. The last use of the temporary job site occurred before September 2002. The temporary job site has not been used since.

If there are any questions concerning this license amendment, please feel free to contact me on my cell phone or at 877-317-5811.

Sincerely,

Patrick J. Byrne
Medical Physics Consultants, Inc.
