Ronnie,

I have confirmed that 1pm EDT (noon CDT) on 6/24 will work for us for the conference call. Please send me the phone number and pass code when you have them.

Donald R. Woodlan

Hello Don,

By any chance we can push the public teleconference to 1pm?

Thanks,

Ronnie Ng

Ronnie – I have a problem; my contractor lives in Washington State, which is 4 hours behind us.

I would like to know if the conference call can be delayed a couple of hours to benefit my contractor – who drafted RAI 4714 and have the best knowledge to clarify the applicant about the subject matter.

Let me know.

Hello Milton,

Below is the email traffic for the teleconference. It will be a public teleconference
6/24/2010
10-11am

Will update the meeting and provide agenda once I have finalized the noticed.

Thanks,

Ronnie Ng

Don,

We need to notice the call for the public to participate. Since your bridge number and passcode don't change, I think we should establish an NRC bridge. We'll do that once we send the notice and see how many, if any, of the public wish to participate. Next week, we'll establish the call agenda and where proprietary or SRI might be discussed.

Ronnie Ng has joined our branch for six months and will be the PM for sections 3.7 and 3.8. So, he will be setting this up. Please include him in correspondence related to those sections. Thank you.

Have a good weekend.

Bill

Bill,

I just received final confirmation and the 24th at 10am EDT works for us. Do you want to use the Luminant Bridge or schedule your own?

Subject: FW: 2010-05-21 Comanche Peak RCOL Chapter 3 - RAIs Number 162 and 167

Steve and Bill,

We have reviewed the questions in RAIs 162 and 167 (re seismic subsystems and category 1 structures). Of the 27 numbered questions in these two RAIs, we feel that about 19 seem to need additional discussion with the NRC. In maybe two or three cases we need some clarification but in most of the cases we need to discuss the bases of the questions and potential alternatives that we intend to pursue to respond to the questions. Some of these options involve resource intensive evaluations or calculations. We would like to confirm that our proposed approaches will provide the information that the NRC needs to write their SER before we expend these resources. Our goal is to issue responses that close all the issues associated with these questions.

Our recommendation is that we schedule a public conference call to discuss these questions. The CPNPP COLA team can be prepared to support such a call by the week of June 21, 2010; therefore, I hereby request a public conference call to discuss the questions in RAIs 162 and 167 during the week of June 21, 2010. This may be a lengthy call because these are complex topics. I suggest Tuesday, June 22, 2010, but any day that week should work. Please determine if the NRC staff and its reviewers can support such a call and propose a date and time.

Due to the need for this public conference call, I am also requesting an extension to respond to these RAIs. I suggest a 32 day extension which would make the new due date Monday, July 26, 2010.

Subject: 2010-05-21 Comanche Peak RCOL Chapter 3 - RAI Number 167

The NRC staff has identified that additional information is needed to continue its review of the combined license application. The NRC staff's request for additional information (RAI) is contained in the attachment. Luminant is requested to inform the NRC staff if a conference call is needed.

The response to this RAI is due within **35** calendar days of May 21, 2010.

Note: If changes are needed to the safety analysis report, the NRC staff requests that the RAI response include the proposed changes.

thanks,

Stephen Monarque
