Air Pollution Control Demolition Permit No. 2824

Dear Mr. Church:

This constitutes your Air Pollution Control Demolition Permit for the demolition of an open shed and a pole barn at the north end of the Tennessee Valley Authority's Sequoyah Nuclear Plant on Sequoyah Access Road. Ms. Kathy Jones, Asbestos Coordinator, reviewed the pictures Ms. Stephanie Howard, Environmental Manager, sent and determined that the structures were corrugated metal and wood on a concrete slab. No potential asbestos-containing materials appeared to be present. I understand TVA employees are demolishing the structures. This permit is subject to the terms and conditions set forth herein and the provisions of the Chattanooga Air Pollution Control Ordinance. You are approved to begin demolition June 1, 2010.

If the project changes from what has been reported in the notification to include more structures, Air Pollution must be informed in writing or by e-mail and an asbestos survey provided or a survey waiver arranged.

We have received the permit fee of \$100. If you have any questions, please contact me at (423) 643-5970, or Kathy Jones, Asbestos Coordinator, at (423) 643-5980.

Sincerely,

Robert H. Coiby
Director
