June 17, 2010

MN No. 10-019

LICENSEE: PSEG NUCLEAR, LLC

FACILITIES: SALEM NUCLEAR GENERATING STATION, UNIT NOS. 1
AND 2
HOPE CREEK GENERATING STATION, UNIT NO. 1

SUBJECT: SUMMARY OF THE PUBLIC MEETING BETWEEN THE
NUCLEAR REGULATORY COMMISSION STAFF AND PSEG
NUCLEAR, LLC TO DISCUSS THE STATUS AND SCHEDULING
FOR THE INDEPENDENT SPENT FUEL STORAGE
INSTALLATION (ISFSI)

On May 27, 2010, the Nuclear Regulatory Commission (NRC) staff met with representatives of PSEG Nuclear, LLC (PSEG) at the NRC Region I office. The purpose of the meeting was to discuss PSEG's plans for ISFSI related activities at the Salem Nuclear Generating Station which shares an ISFSI storage pad with Hope Creek Generating Station. Attachment 1 lists the meeting attendees.

PSEG representatives provided a status update in preparation for the upcoming ISFSI dry run and initial loading campaign to be performed at the Salem Nuclear Generating Station. The presentation included an overview of the ISFSI history at the stations, the regulatory status of the stations, dry cask storage operations, upgrades made at the stations specifically due to ISFSI operations, and schedule for the Salem Nuclear Generating Station's first ISFSI loading campaign. NRC asked a number of questions related to issues such as: operation of the zero profile transporter, height of the vertical cask transporter, and seismic calculations. At the conclusion of the meeting, public attendees were offered the opportunity to ask questions of NRC officials, but none were asked. Feedback forms were made available to all attendees and will be evaluated, if submitted.

The meeting notice with the attached meeting agenda and the PSEG Nuclear, LLC presentation can be located in ADAMS package ML101241006. ADAMS is accessible from the NRC website at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

/RA/

Judith A. Joustra, Chief
Decommissioning Branch
Division of Nuclear Materials Safety
