**SUBJECT: TETRA TECH EC, INC.  
NOTIFICATION OF LICENSE USE AT TEMPORARY JOBSITE  
MATERIALS LICENSE NO. 29-31396-01  
DOCKET NUMBER 03038199**

Dear Director:

The purpose of this letter is to notify you of our intention to initiate activities at a temporary jobsite under this license.

The work will be conducted at the former Lowry Training Annex in Colorado. The former Lowry Training Annex is located at:

3101 South Watkins Road  
Watkins, Colorado 80137

Tetra Tech EC, Inc. (TtEC) has been contracted by the Department of the Navy to perform a confirmatory radiological survey to ensure that no depleted uranium (DU) munitions remain at former DU munition testing sites within the Lowry Training Annex. No radioactive material is expected to be recovered; however, there is a possibility that approximately 100 fragments, totaling less than 15 pounds, of solid DU munitions may be discovered during radiological surveys.

If any DU munition fragments (containing U-238 and U-235) are located, they will be collected for transfer to the Navy's Low Level Radioactive Waste contractor for disposal as radioactive waste.

The expected start date is July 5, 2010, with a completion date of September 30, 2010. It should be noted that if DU munitions and/or fragments are found, this may increase the scope of work, and prolong the completion date for the project.

Key onsite personnel include the Project Manager, Jed Lowrey, at (303)419-7428 and the Radiation Safety Officer Representative, Chuck Taylor at (303)699-8456.
