Re: Amendment to Sections 11 & 17A for Materials License Number 13-32670-01

To whom it may concern,

I'm submitting this correspondence to request an amendment to our company's Materials License (13-32670-01; ArcelorMittal Burns Harbor, LLC).

1. We would like to remove Mr. Roger Hurd from sections 11 & 17A. He is no longer working for the company.
2. We would like to add the following statement at the end of the existing language in 17A:  
**In circumstances where temporary relocation is necessary, and the above individuals are not immediately available, temporary relocation can be conducted by trained radiation workers that have received the initial and refresher training described in Section 8.4 of the Burns Harbor Policies Governing the Use of Ionizing Radiation submitted as part of the application dated August 27, 2007.**

The reasoning for #2 above is to optimize the practice of ALARA in situations where non-radiation workers may need to work in the vicinity of radiation gauges (i.e. facility outages, mill breakdowns, etc.). These situations could occur at any time (24/7) and this amendment will allow our trained radiation workers (those that have received the initial and refresher training described above) to temporarily relocate the radiation gauges without my physical presence as RSO. If the radiation gauges are moved under these circumstances, they will be moved to a safe, secured location with access limited to only the trained radiation workers that relocated them. The secured temporary storage location will be demarcated with appropriate signage. Also, the RSO will be notified so the situation can be reviewed as soon as possible.

Thank you,  
Sincerely

Chris Sarvanidis
