Subject: State of South Carolina files petition to intervene in ASLB adjudicatory process on DOE Yucca Mountain application

Message | SC Petition 2-26-10.pdf (1 MB)

Hi all -

The attached petition to intervene from the State of South Carolina has been filed with the NRC's Atomic Safety and Licensing Board (ASLB or the Board) re: the adjudicatory process on the DOE's application for a high-level waste repository at Yucca Mountain. Because the notice of opportunity for hearing occurred when the NRC docketed the application, this is considered a "late file" (which the State acknowledges in the attached) which are allowed to be considered under procedures. Therefore, the ASLB will review and consider this filing. I'll keep you posted on filings to the Board related to YM.
