Subject: Duke Energy proposed Nuclear Plants.

To all, I would like to express my support of the 2 proposed reactors in the Gaffney, S.C. area. I have worked outages and in operating facilities and I personally know that these plants can be run SAFE and efficiently. The only people that don't know the industry in its true form are the ones that oppose the plants. Not only will these plants boost the local economy like never before it will sub -stain a large number of Full time jobs to the area but also will see added temporary jobs during re-fueling and so on. I think that It not need mentioned but this area of the country has lost many of its local jobs to the overseas textile industry causing many local residents to be un-employed. Again I have worked in the industry and STRONGLY support the construction of theses plants. Thanks for your time.
