Latest Licensee sample results

DSP-132 is the storm drain nearest the U1 intake canal.

DSP-140 is the storm drain near the 2/3 CST's that the original sample was found.

MW-DN-107 S - is the shallow well near the 1A CST

There is also a simplified diagram attached for locations - it's not to scale and the U1 intake is NOT next to the 1A CST

*H-76*
