Subject: Draft RAI 248 CHPB 4731

Rob,

Attached is DRAFT RAI No. 248 (eRAI No. 4731). You have until June 17, 2010, to review this RAI and decide whether you need a conference call to discuss the question in this RAI before the final issuance. After the phone call or on June **17**, 2010, the RAI will be finalized and sent to you for response. You will then have 30 days to provide a technically complete response or an expected response date for the RAI.

Thanks.

SURINDER ARORA, PE
PROJECT MANAGER,
Office of New Reactors
US Nuclear Regulatory Commission

Calvert Cliffs Unit 3
UniStar
Docket No. 52-016
SRP Section: 01 - Introduction and Interfaces
Application Section: Chapter 1, Introduction and General Description of the plant

QUESTIONS for Health Physics Branch (CHPB)

01-10

In UniStar's letter transmitting Revision 2 of the COL application, dated March 14, 2008, and in Part 1, "General and Financial Information," of the COL application, UniStar requested material licenses for receipt, possession and use of source, byproduct and special nuclear material in accordance with Commission regulations in 10 CFR Parts 30, 40, and 70.

However, in order for the staff to conduct its review, the applicant should address their request for these licenses in Chapter 1 of the FSAR. In addition, the request should point to other parts of the FSAR that provide sufficient information in the areas of radiation protection (including sealed source leak testing and maintenance), fire protection, training, security and emergency planning, to support compliance with the applicable portions of 10 CFR Parts 30, 40 and 70.

Please revise the FSAR as described above and as necessary to include sufficient information for staff to complete 10 CFR Parts 30, 40 and 70 license reviews.
