Hi Dan,

Let me know if you need anything else.

Bruce

Such a simple answer. This is a first for me. Typically, I get a multi-zoned answer, such as agriculture with ability to use for heavy industrial ....

Do you need anything else or a further clarification?

That entire area is zoned Natural Resources/Agriculture.

Let me know if you need anything else.

Good morning Melodie,

My team member included a map of the area in which he requests zoning information from your county. We need this data for inclusion in our environmental analysis of the proposed AREVA Eagle Rock Enrichment Facility. Thank you for your assistance!

Bruce,

I am attaching the land use map from the ER. I need to know the zoning in Bingham County for the portion of the county within 5 miles of the proposed facility.

Let me know if you need additional information.

Dan

Yes, I can help you with this request. No, we do not have the zoning maps on line.

What address(s) would you like to know the zoning for?

Hello Melodie,

I am a senior environmental project manager with the Nuclear Regulatory Commission (NRC). NRC received a proposal from AREVA to construct a nuclear enrichment facility in Bonneville County. My team is evaluating the environmental impacts that may result during the construction, operation, and decommissioning phases of this project. One of the environmental items under review is land use. My team asked if you could help us with zoning information. We tried an internet search and could not find any zoning maps for Bingham County on-line. Can you assist us?

Thanks you!
