U.S. Climate Policy Action

The Center for Climate Strategies (CCS) is helping many public officials and stakeholders in the United States and other countries respond to the challenges posed by global warming and related opportunities for economic development, clean energy, and a safer environment. The map below shows climate action plans underway or completed by U.S. states since 2000, many through CCS processes.

Click on the map below to see climate change work going on in a specific state.
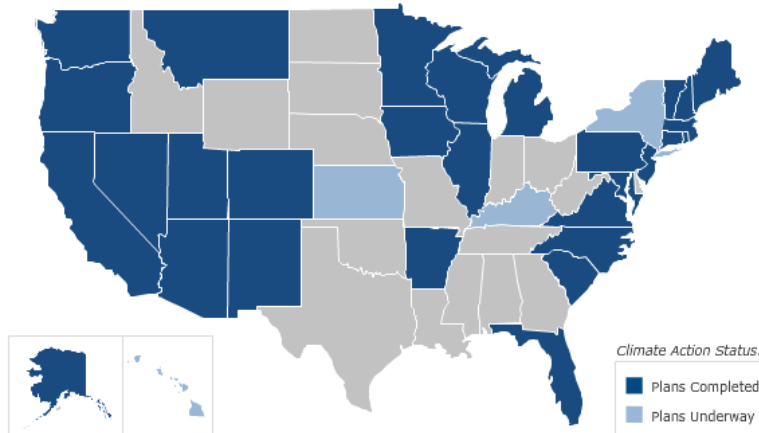

See the Wisconsin Macroeconomic Study here.

- Plans Completed
- Plans Underway

News

[Colorado legislature raises state RES, move seen creating jobs](#)
A coalition of stakeholders who worked on the Colorado Climate Panel's were critical to the new legislation's passage. Since investor-owned utilities supply 60% of Colorado's electricity, this implements most of the Panel recommendation (adopted by the Governor) on renewable energy standards (RES).

[Analysis Says Energy Bill would Boost GDP, Jobs](#)
The Clean Energy Jobs Act, recently introduced in the Wisconsin legislature, can create jobs and improve the state's economy according to a recent Center for Climate Strategies study.

[Study Says Michigan Climate Plan Would Boost Economy](#)
An independent analysis says a plan intended to help Michigan fight global climate change also would give the state economy a boost.

[Southern Climate Policy Study Released](#)
Report produced by CCS for the Southern Governors' Association shows substantial potential to reduce greenhouse gas emissions in the region.
