U. S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Washington, DC 20555

Hope Creek Generating Station
Facility Operating License No. NPF-57
NRC Docket No. 50-354

Subject: 10 CFR 54.21(b) Annual Amendment to the Hope Creek Generating Station
License Renewal Application (TAC No. ME1832)

Reference: Letter from PSEG Nuclear, LLC to USNRC, "Application for Renewed Operating
License – Hope Creek Generating Station", dated August 18, 2009

In the referenced letter, PSEG Nuclear, LLC (PSEG) submitted a License Renewal Application (LRA) for the Hope Creek Generating Station. As required by 10 CFR 54.21(b), a review has been performed to identify any current licensing basis (CLB) changes made since submittal of the LRA which have a material effect on the content of the LRA, including the FSAR Supplement.

PSEG has concluded that there have been no changes to the Hope Creek CLB that materially affect the LRA.

Note that since submittal of the LRA on August 18, 2009 a significant amount of information has been provided to the NRC in written correspondence (e.g., responses to NRC RAIs and LRA Supplements) that has supplemented and modified the LRA. In the context of 10 CFR 54.21(b), this information is considered to be part of the LRA and is not relevant to this 10 CFR 54.21(b) annual update.

There are no new or revised regulatory commitments contained in this letter.

If you have any questions, please contact Mr. Ali Fakhar, PSEG Manager - License Renewal, at 856-339-1646.
