

The FSL data were downloaded on 08/01/09 but this FSL home page (previously <http://raob.fsl.noaa.gov/>) was downloaded on 02/14/10 for documentation.

NOAA/ESRL Radiosonde Database Access

General information about this database including access software, CDrom ordering, station histories, and data availability can be found at our [home page](#). We also produce an [online inventory](#) that is created at the end of each year when we re-process the real-time data.

RECENT UPDATES:

- Feb-11-2009 - 2008 DATABASE UPDATE: Merged all NCDC (IGRA) data and ESRL/GSD collected GTS data for 2008. Updated station lists.
- Apr-06-2009 - Added [19 WMO stations](#) to the database and updated the master station list.
- Apr-06-2009 - Updated the [online inventory](#). It now contains an inventory for all stations from 1994-2008.
- May-30-2009 - The DVD - produced at NOAA/ESRL, contains all global radiosonde observations from 1994-2007, released and available at NCDC's [online store](#).
- Jun-01-2009 - Released version 3.0 for Windows.
- Aug-31-2009 - Released version 3.4 - which makes the NetCDF output format available again.

I. Input Dates: (UTC units)

From: yr 2010 mo 2 dy 15 hr 0

Thru: yr 2010 mo 2 dy 15 hr 0

II. Sounding Specific Information

Hours of access: All Times *Data levels:* All Levels

Wind Units: Knots

III. Select Stations / Data

Select Radiosonde Sites by: WMO Station Identifier
