Reference: NRC Docket 150-00042
GeoInstruments Logging, LLC NRC License 42-29371-01

On April 21, 2010, while GeoInstruments Logging (the Company) was working under a reciprocity permit, the NRC conducted a field inspection of the Company's operation in Crook County, WY. The Company was found to be in violation of 49 CFR 177.817 because the Company's vehicles did not have the applicable shipping documents for the UN 2911, Excepted Package, Instruments. This was a Severity Level IV violation. The instruments themselves were properly labeled with UN 2911 labels.

A review of 49 CFR 177.817 was conducted and, after consultation with the Company's radiation safety consulting firm, the proper document was drafted. A shipping document for each vehicle used to transport UN 2911 instruments was printed, inserted into a holder, and shipped to the vehicle operators to be attached to the inside of the driver's door in accordance with 49 CFR 177.817 (2)(ii)(A).

The documents were sent via overnight FedEx to all drivers transporting UN2911 instruments. Posting should be completed by June 25, 2010.

James L Turner
Radiation Safety Officer
