RE: *LICENSE NO 21-20020-01*
ADDITIONAL INFORMATION TO CONTROL NO. 318978

Dear Mr. Herr:

In response to your correspondence dated June 30, 2010, we offer the following information.

A table is attached to this transmittal that shows the model and serial number of each density gauge, the location each gauge is stored in, and the amount of radioactive material in each gauge. This table indicates that we possess a total of 88 mCi of Cs-137 and 440 mCi of Am-241:Be.

The attached table shows the location of each gauge. Gauges with serial numbers 20614, 27072, 24232 and 24233 were previously stored at either the 713 South Scott or the 4703 Chester Drive location. These gauges are now stored at the 4703 Chester Drive location. We are requesting that these gauges be allowed for storage at the new location of 412 S. Lafayette Blvd as well as "close out" the 713 South Scott Street location. Leak test results for these gauges were provided in our previous submittal.

To confirm that the new location at 4703 Chester Drive, Elkhart location has adequate security measures the gauges will be stored in their locked storage cases in a locked metal cabinet in a locked pole building.

The Wightman Ward location at 9835 Portage Road, Michigan has changed names to Wightman & Associates. No change or transfer of ownership has occurred.

We hope that this information is of use to you. Please contact me if you have any further questions or need any further information.

Sincerely,

WIGHTMAN ENVIRONMENTAL, INC.

Jon M. Hermann
Radiation Safety Officer
