Office of New Reactors
U.S. Nuclear Regulatory Commission

In its May 25, 2010 letter to address gas intrusion, Westinghouse proposed design changes included instrumentation level switches, LS 070 through LS 077, as shown in Sections H and J of Figure 6.3-2.

- A. Identify the table where these switches are listed and classified.
- B. Describe the calibration frequency of these switches.
- C. Discuss whether the calibration frequency is controlled by Technical Specifications.
- D. Discuss whether the new instrumentation and valve components are included in the ITAAC. If they are not included in ITAAC, provide a justification.
