I have reviewed the comments submitted to the United States NRC in Washington, DC. It is documented very clearly that these two proposed nuclear power reactors should not be constructed in Jenkinsville, South Carolina and it is clear to me and the citizens of Jenkinsville, South Carolina that you use terms as wildlife, economic environment, no one care about what can happen to us as a people because SCE&G, Santee Cooper nor our State representatives live in Jenkinsville. It is personal interest in the current and future developments. (Yes it's personal).

It is documented that the Nuclear Regulatory Commission does little to protect the public. I pray that the statement is proven to be untrue.

In 2000 VC Summer Nuclear Power Plant in Jenkinsville has suffered leaks of radiation in the coolant system. You and I know that there are unreported and/or documented accidents that have occurred.

SCE&G will never be able to do what was done 30 years ago with the building of the #1 nuclear power reactor. Today policymakers and employees aren't the same ones who planned and constructed the Nuclear Power Reactor #1. The last reactor was built in 1985 and as you know most have retired or at retirement age.

Closed nuclear power plants can never be removed. It's a lifetime fixtures.

Verna J. Byrd, Jenkinsville, SC,  
Resident
