Mathews,

Here is the data I do have available right now - included are the NNL boundaries, allotments, vegetation (BLM lands only), Twenty Mile Lava Trail, and VRM.

I am still trying to reach someone at the INL about the sagebrush reserve boundary.

If you need WSAs, they can be downloaded from Inside Idaho website - select browse data, Choose Category: Administrative & Political Boundaries, and Publisher: Bureau of Land Management, Idaho Office or use url/link below:
