

NUCLEAR ENERGY INSTITUTE

Jeannie M. Rinckel
EXECUTIVE DIRECTOR
REGULATORY AFFAIRS
NUCLEAR GENERATION DIVISION

June 30, 2010

Mr. Timothy J. McGinty
Director
Division of Policy and Rulemaking
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001

Subject: Submittal of NEI 10-06, Revision 0, "Regulatory Issue Resolution Protocol: A Method for Resolving Regulatory Issues with Generic Implications"

Project Number: 689

Dear Mr. McGinty:

Enclosed for your reference and use is NEI 10-06, Revision 0, "Regulatory Issue Resolution Protocol: A Method for Resolving Regulatory Issues with Generic Implications." This guidance document represents the compilation of efforts from the NEI Regulatory Issues Resolution Protocol Team along with your dedicated team of NRC representatives. It is the product of the many public working meetings between the industry and the NRC and specifically includes the lessons learned gathered from piloting the protocol with the Inaccessible Power Cable Issue Teams.

NEI and the nuclear industry appreciate your efforts and those of your staff. I look forward to collectively promoting the use of the protocol for timely resolution and close-out of regulatory issues and interacting with you on transitioning its administration to the NEI Licensing Action Task Force as the gatekeeper of the protocol.

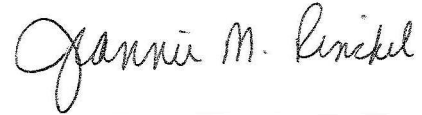

Mr. Timothy J. McGinty
