

Phone/Conference Call Record

Project/Plant: Levy County Nuclear Plant

Date: May 21, 2010

Time: 10:00

Attendees:

Name	Title	Agency/Organization
William Mendez	Senior Fellow, Health Sciences	ICF International
Emily Wilson	Representative	Levy County (FL) Health Department

Call title/subject: Waterborne disease outbreaks

Purpose of call: To ascertain whether they had been any recent (2008-2010) outbreaks of waterborne disease (*Salmonella*, *Shigella*) or any recorded cases of primary amoebic meningoencephalitis (PAM) in Levy County

Call notes:

- Ms Wilson responded to our telephone inquiry to Tommy McQueen, the Levy County Epidemiologist.
- Ms. Wilson indicated that the Health Department was not aware of any *Salmonella* or *Shigella* outbreaks in Levy County in the last two years. She recommended that we consult the CHARTS disease monitoring system maintained by the Florida Department of health for recent statistics on waterborne disease outbreaks.
- She stated that there had been no recent cases of PAM in Levy County to her knowledge.
