Dear Mr. O'Brien

Mistras Group, Inc., formerly CONAM Inspection & ESI, provides the following in accordance with our agreement established with the NRC during the alternative dispute resolution (ADR) session held on September 10, 2008. During the ADR, Mistras agreed to provide the NRC a summary of the safety conscious work environment (SCWE) survey results that was performed from March 8th – April 2nd, 2010.

Mistras utilized the previous survey results as a baseline for the latest survey. The results of this survey noted an overall improvement in the grading of our safety culture and program by our employees. As mentioned previously the survey considered our employees perspective related to methods established to report safety concerns, management's commitment to safety, management receptiveness to safety concerns, fear of retaliation, safety training, and peer checking to name a few. Further, the survey was again conducted anonymously providing for open, honest and forthright feedback from our employees.

After reviewing the data provided from the survey I attribute the improvement to our emphasis on communication. It appears that the efforts made to promote our Safety Hot Line and the push of safety related topics/material from the corporate office has produced a positive result.

Finally, the performance of this survey fulfills our deliverables as committed to during our ADR. If you have any questions or comments, please feel free to contact me.

Sincerely,

A handwritten signature in dark ink, appearing to read "Chris Smith", written over a light-colored background.

Christopher G. Smith
Group Corporate Compliance Office
