SUBJECT: Transmittal of Revision #6 to the Physical Security Plan for R-110 and SNM 1373 Licenses.

Enclosed is Revision #5 of the Physical Security Plan for the Nuclear Engineering Laboratory complex at Idaho State University. This document is intended to replace Revision #5, which was produced earlier this year. The revisions incorporated in this document reflect only additional information about the construction of the facility and clarification concerning our confirming to protocol, as recommended by members of your staff in their visit a few months ago. None of the wording changes and additions affect the level of security.

This plan concerns the two reactor NRC licenses:
R-110 License, with Duane Hardesty as the NRC Project Manager
SNM-1373 License, with Mary Adams as the NRC Project Manager

Please note that the document, Physical Security Plan, is designated as **Safeguards Information**. It is not for public disclosure.

Should you have any questions, please refer them to the Reactor Administrator, Dr. Jay Kunze, at 208-282-4147, kunzejay@isu.edu.

Sincerely,

Pamela L. Crowell

Pamela L. Crowell, PhD
Vice President of Research

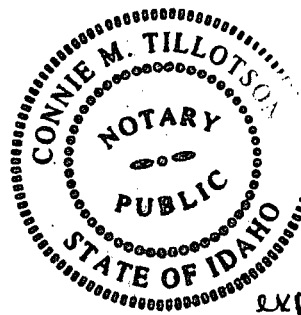

Affirmation:

I certify that the foregoing is true and correct:

Executed on 6 July, 2010. Signature: *Connie M. Tillotson*
