Dr. Melinda P. Krahenbuhl
Facility Director
The Dow Chemical Company
1602 Building
Midland, MI 48667

SUBJECT: DOW CHEMICAL COMPANY - NRC SECURITY INSPECTION REPORT NO.
50-264/2010-202

Dear Dr. Krahenbuhl:

The U.S. Nuclear Regulatory Commission (NRC, the Commission) conducted a routine announced security inspection at your Dow TRIGA Research Reactor (Inspection Report No. 50-264/2010-202). The enclosed report documents the inspection results, which were discussed on June 23, 2010, with you and other members of your staff.

The inspection examined activities conducted under your license as they relate to security and compliance with the Commission's rules and regulations, implementation of certain compensatory measures, and compliance with the conditions of your license. The inspector reviewed selected procedures and records, observed activities, and interviewed personnel. Based on the results of this inspection, no findings of significance were identified. No response to this letter is required.

In accordance with Title 10 of the *Code of Federal Regulations* Section 2.390, "Public inspections, exemptions, and requests for withholding," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (Agencywide Documents Access and Management System (ADAMS)). ADAMS is accessible from the NRC Website at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room). However, because of the security-related items contained in the enclosure, and in accordance with 10 CFR 2.390(d), a copy of the enclosure will not be available for public inspection.
