

Groundwater Protection Initiative

Meetings with State:

April 24, 2008:

Attendee's NC-DENR –

Radiation Protection Section: Dale Dusenbury

Aquifer Protection

Greg Barley

Louise England

Busch Goncarovs

Heather Baxter

- Discussed groundwater hydrogeology on site – showed a map of the locations of the wells and how current groundwater monitoring wells addressed groundwater gradient.
- Discussed results of groundwater well samples and how so far none of the wells have been detectible.
- Reviewed North Carolina Administrative Code “Classification and water quality standards applicable to the Groundwater’s of North Carolina.”
- Discussed how to the state of North Carolina any detection of tritium in groundwater was considered a violation regardless if the water was a drinking water source.
- Reconfirmed that the site’s groundwater is under the purview of the NRC and federal regulations.
