SUBJECT: CORRECTION TO INITIAL OPERATOR LICENSING EXAMINATION WRITTEN
EXAMINATION APPROVAL INDIAN POINT NUCLEAR GENERATING UNIT 2

Dear Mr. Pollock:

The purpose of this letter is to correct examination dates previously communicated to you for the upcoming operator licensing examinations at Indian Point Unit 2.

The NRC has completed its review of the operator license applications submitted in connection with this examination and separately provided a list of approved applicants to the Manager, Training and Development. Note that any examination waivers and application denials have been addressed in separate correspondence.

The NRC has approved the subject written examinations in accordance with Revision 9, Supplement 1, of NUREG-1021, Operator Licensing Examinations Standards for Power Reactors. Your staff will administer the written examinations during the week of July 19, 2010. This examination has undergone extensive review by my staff and representatives responsible for licensed operator training at your facility. Based on this review, I have concluded that the examination meets the guidelines of NUREG-1021 for content, operational, and discrimination validity. By administering this examination, you also agree that it meets NUREG-1021 guidelines, and is appropriate for measuring the qualifications of licensed operator applicants at your facility. If you determine that this examination is not appropriate for licensing operators at your facility, do not administer the examination and contact me at (610) 337-5046.

Please contact your Chief Examiner, John G. Caruso, at 610-337-5389, if you have any questions or identify any errors or changes in the license level (RO or SRO) or type of examination (partial or complete written examination) specified for each applicant.

Sincerely,

Samuel L. Hansell, Chief
Operations Branch
Division of Reactor Safety
