Mr. John M. Fowler, Director  
Office of Federal Agency Programs  
Advisory Council on Historic Preservation  
Old Post Office Building  
1100 Pennsylvania Avenue, NW, Suite 803  
Washington, DC 20004

SUBJECT: SECTION 106 CONSULTATION AND NOTIFICATION OF THE ISSUANCE OF  
THE DRAFT ENVIRONMENTAL IMPACT STATEMENT FOR THE PROPOSED  
LEVY NUCLEAR PLANT UNITS 1 AND 2 COMBINED LICENSES  
APPLICATION REVIEW

Dear Mr. Fowler:

The U.S. Nuclear Regulatory Commission (NRC) is reviewing an application submitted by Progress Energy Florida, Inc., for combined licenses (COL) for construction and operation of two new nuclear power units at its proposed Levy Nuclear Plant site near Inglis, Florida. The U.S. Army Corps of Engineers (USACE), Jacksonville District, is a cooperating agency on the review of the proposed action that is being conducted under the requirements of the National Environmental Policy Act of 1969, as amended (NEPA). As part of the review of the proposed actions, the NRC and USACE review team has prepared the enclosed draft environmental impact statement (DEIS). The DEIS, NUREG-1941, includes analyses of relevant environmental issues, including potential impacts to historic properties, and documents the review team's determination regarding the environmental impacts at the proposed site from the construction and operation of two new nuclear units.

In a November 6, 2008, letter, the NRC staff notified you that it will comply with its obligations under Section 106 of the National Historic Preservation Act of 1966, as amended (NHPA), using the process set forth in Title 36 of the *Code of Federal Regulations* (36 CFR) Part 800, Section 8(c), in lieu of the procedures set forth in 36 CFR 800.3 through 36 CFR 800.6. Pursuant to 36 CFR 800.8(c), the NRC staff is using the preparation of the DEIS required by NEPA to comply with its obligations under Section 106 of the NHPA.

The review team conducted an environmental audit at the site and has reviewed historic and archaeological records. The NRC staff also contacted five Native American Tribes identified as having potential interest in the proposed undertaking. The review team has determined that the Area of Potential Effect (APE) for the COL review is the area at the power plant site and the immediate environs that may be directly or indirectly impacted by the project. The APE is influenced by the limitation of the scale and nature of the NRC undertaking which does not include most of the ground disturbing activities which constitute "preconstruction" activities. Many of the activities required to build a nuclear power plant do not fall within NRC's regulatory authority and, therefore, are not "construction" as defined by the NRC in 10 CFR 51.4. Such activities are referred to as "preconstruction" activities in 10 CFR 51.45(c).

The preliminary determination in the DEIS is that the impacts from NRC-authorized construction, preconstruction, and operation on historical and archeological resources would be small and mitigation may be warranted in the event of an unanticipated discovery. The review team's determination of cumulative impact on historical and archaeological resources from the building and preconstruction activities in addition to other past, present, and reasonably foreseeable actions would be small. For the purposes of Section 106 of the NHPA consultation pursuant to 36 CFR 800.8(c), the review team concludes with a finding of no historic properties affected.

In accordance with our November 6, 2008, letter, the NRC staff is forwarding the DEIS for your review and comment. Pursuant to 36 CFR 800.8(c), the NRC staff is requesting your comments on the DEIS, and, specifically, on the preliminary conclusions regarding historic and cultural resources. The NRC staff will address your comments in the final environmental impact statement, thus completing consultation under Section 106 of the NHPA with the Advisory Council on Historic Preservation regarding the Levy Nuclear Plant COL application. Please provide any information or comments you may have on the DEIS during the comment period, which ends on October 26, 2010. Comments should be submitted either by mail to the Chief, Rulemaking and Directives Branch, Division of Administrative Services, Office of Administration, Mailstop TWB-05-B01M, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, or via e-mail to [Levy.COLEIS@nrc.gov](mailto:Levy.COLEIS@nrc.gov).

The NRC and USACE plan to hold two public meetings to present the analyses and results in the DEIS and to receive stakeholders comments on Thursday, September 23, 2010, at the Plantation Inn, 9301 West Fort Island Trail, Crystal River, Florida. The first meeting will convene at 1:30 p.m. and will continue until 4:30 p.m., as necessary. The second meeting will convene at 7:00 p.m., with a repeat of the overview portions of the first meeting, and will continue until 10:00 p.m., as necessary. The meetings will be transcribed and will include: (1) a presentation of the contents of the DEIS; and (2) the opportunity for interested government agencies, organizations, and individuals to provide comments on the draft report. Additionally, the NRC and USACE staff will host informal discussions one hour before the start of each meeting during which members of the public may meet and talk with NRC and USACE staff members informally. You and your staff are invited to attend.

If you have any questions concerning the environmental review of this COL application, please contact Mr. Douglas Bruner, Environmental Project Manager, at 301-415-2730, or via e-mail to [Douglas.Bruner@nrc.gov](mailto:Douglas.Bruner@nrc.gov).

Sincerely,

*/RA/*
