**Subject:** NRC Request for Additional Information for review of Model 235R001 package (Docket No. 71- 6386)

Hi Chris--- as we discussed on the phone this morning, we have received your letter of June 30, 2010 which forwards the NRC Request for Additional Information (RAI) for our March 31, 2010 proposed amendment to add A1B contents to the model 235R001 package (CoC 6386). I appreciate very much the very prompt review that your staff performed on this application.

We will provide a response to your five RAIs approximately September 15, 2010. We do not believe that we will need to meet with you to discuss your questions or our responses. As discussed, an NRC CoC issuance for this new package content by the end of January 2011 will meet our Program needs.

Thanks again for your attention in this matter.
