Angelo –

On July 6, 2010, the NRC staff received the Smith Ranch Highland Uranium Project 2010 annual surety update. This document was submitted to address license condition 9.5 of license SUA-1548. The staff plans to initiate its acceptance review process once the copies of the annual surety update included in the WDEQ annual report are received.

The staff has also recently received a copy of a new byproduct material disposal agreement. The staff is in the process of reviewing this document.

If you have any questions, I can be reached at 301-415-0724.
