SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NUMBER
11-27749-01

By NRC Form 314 dated April 9, 2010, and letter dated April 12, 2010, you informed the U.S. Nuclear Regulatory Commission (NRC) that you wished to terminate your NRC radioactive materials license. The NRC Form 314 dated April 9, 2010, stated that all radioactive material had been transferred to Qal-Tek Associates, LLC, License Number 11-27610-01.

The supporting documentation to the NRC Form 314 also provided a copy of the latest leak test results. The leak test results document that there was no evidence of leakage of radioactive material from the sealed source. A review of the historical file supported that only short lived radioactive materials were possessed by the licensee. The NRC staff has reviewed the supporting documentation to your NRC Form 314. Based on the documentation submitted and a review of your historical file, the staff concluded that all licensable radioactive material has been removed from the facility and the facility at 7103 West 45th West, Idaho Falls, Idaho, is suitable for unrestricted use in accordance with 10 CFR 20.1402, "Radiological Criteria for Unrestricted Use." Based on these conclusions, no further remediation or actions with respect to NRC regulated material is required.

Please find enclosed Amendment Number 01 to License Number 11-27749-01, authorizing your license termination. An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(20)(ii).

Schiess and Associates, PA
