**Cc:** Dosa, John J  
**Subject:** RE: NMP2 EPU Response to Component Performance and Testing RAI

Theresa,

I'd like to schedule a 2nd teleconference with you to discuss the 12/23/09 RAI response to the Component Performance and Testing Review Branch (RAI-G questions).

Regarding the response to RAI G3, the last paragraph on page 29 of 31 in attachment 1 states:

"The combined margin of 73.6 psi is recognized to provide minimally sufficient margin for SLCS pump discharge valves, at both CLPT and EPU conditions. As such, the piping is being rerated and the relief valve set pressure increased to provide additional margin."

- we'd like to understand how the margin of 73.6 psi was determined
- also, we'd like to know what the SLCS relief valve discharge pressure is being reset to and when this is going to be done

Please let me know when you can support a conference call. Wed or Thursday a.m., or anytime next Tuesday works for us.

Thanks,

*Rich Guzman*  
*Sr. Project Manager*  
*NRR/DORL*  
*US NRC*  
*301-415-1030*
