Subject: RE: STP Chapter 14 RAIs 4861 and 4862

Mark/Stacy,

I certainly wouldn't presume to tell tech staff what they do and do not need to ask in order to draw the appropriate safety conclusions. In the case of Station Blackout, an ACRS question prompted our reviewer to ask an additional RAI because he thought it was important to his safety conclusion. If that is the case here I support issuing the RAI and incorporating our evaluation of the response in the SER.

VR,

George

George, Stacy,

Reading Sam's response, it does seem appropriate to issue these RAIs since they are ACRS related and mgmt has approved. (Or maybe we can request revised responses to existing RAIs if we don't have sufficient time.)

Agree??

Mark

Mark et. al.,
These Chapter 14 RAIs are directly related to the turbine overspeed protection questions in Chapter 10 which George has agreed to issue.

As a reminder, these questions point to the very concerns that ACRS members also raised about the diversity of digital turbine overspeed trip protection system during a number of ACRS meeting on Chapter 10, across design centers. My division management has been briefed of the RAIs, not just for STP, but for all design centers. Please proceed with issuing the RAIs.

Subject: STP Chapter 14 RAIs 4861 and 4862

Devender and Sam,

I discussed the two new Chapter 14 RAIs with our lead PM, George Wunder. Since these two RAIs (4861 and 4862) are not supplemental RAIs to current Open Items in Chapter 14 and are brand new issues, these two RAIs will need Division level approval. Please provide justification, with Division Director approval, for asking these new RAIs in Phase 4 of the STP COL review.

Thank you,
Stacy Joseph
