

July 22, 2010

Mr. Jon F. Winter
Manager Environmental & Regulatory
Affairs, Wyoming
Uranium One Americas, Inc.
907 N. Poplar Street, Suite 260
Casper, Wyoming 82601

SUBJECT: SUMMARY OF JULY 14, 2010, MEETING AND TELECONFERENCE –
URANIUM ONE USA, INC., (FORMALLY COGEMA MINING, INC)., IRIGARAY
AND CHRISTENSEN RANCH PROJECT, WYOMING, LICENSE RENEWAL
APPLICATION (TAC No. J00564)

Dear Mr. Winter:

Enclosed is a summary of the meeting held on July 14, 2010, between U. S. Nuclear Regulatory Commission (NRC) staff and Uranium One Americas, Inc., parent company of Uranium One, USA, Inc. All in attendance actively participated in the meeting. The meeting was publicly noticed on June 30, 2010, on the NRC public website.

If you have any questions regarding this letter or the enclosed meeting summary, please contact me at (301) 415-7777, or by email at ron.linton@nrc.gov.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice for Domestic Licensing Proceedings and Issuance of Orders," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records component of NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

/RA by B. VonTill for/

MEETING REPORT

DATE: July 14, 2010

TIME: 10:45 a.m. to 12:00 noon

PLACE: U.S. Nuclear Regulatory Commission
Two White Flint North, Rockville, Maryland
Room T8C5

PURPOSE: Discuss License Renewal Application for Irigaray and Christensen Ranch
ISR Facilities

ATTENDEES: SEE ATTACHED ATTENDEE LIST

BACKGROUND:

The purpose of this meeting was for Uranium One Americas, Inc., parent company of Uranium One USA, Inc., (formally known as Cogema Mining, Inc.) and Nuclear Regulatory Commission (NRC) staff to discuss the Source Materials License Renewal Application, NRC License SUA-1341. This meeting was publicly announced on NRC's public webpage on June 30, 2010. The meeting started at 10:45 a.m. eastern time in Conference Room T8C5. An opening statement was presented by Ron Linton, NRC. Participants introduced themselves.

The meeting was attended by those listed in the attachment to this meeting report.

DISCUSSION:

The participants discussed the following items:

1. Removal of references to standard operating procedures (SOPs) in the License Renewal Application.

Discussion: NRC staff indicated that a request to remove SOPs in the license would be considered and reviewed as would any request, provided the request is made in writing to the NRC during the License Renewal Application review process.

2. Modification to the renewal application to use H₂SO₄ or HCl in the elution process for pH control.

Discussion: NRC staff indicated that this request would be considered and reviewed, provided the request is made in writing to the NRC during the License Renewal Application review process.

3. Discuss NRC specific needs in regards to meeting the requirements in 10 CFR 40 Appendix A, Criteria 7 & 8, outside of effluent calculation through modeling.

Enclosure

Discussion: NRC and Uranium One discussed this issue at length. NRC indicated that there is no specific method, approach, or model to use to meet the requirements of 10 CFR 40, Appendix A, Criterion 7 and 8. At the end of the discussion there seemed to be a general understanding of the issue raised by NRC staff in an open issue in previous correspondence.

4. Status update and time line for the final Safety Environmental Report (SER) (post submittal of request for additional information (RAI) responses and renewal document page replacements) and the Environmental Assessment.

Discussion: Since Uranium One has not responded to open issues as discussed in NRC correspondence dated February 18, 2010, NRC staff cannot speculate on a timeframe for completing this licensing action. There was a discussion of the status of the Environmental Assessment which has been sent to other agencies for comment. Uranium One commented that its responses to open issues would likely contain page changes to the License Renewal Application.

5. NRC status on path forward on resolving how licensees are to meet the requirements of Appendix A ,Criterion 5(B)5.

Discussion: There was a lengthy discussion of the point of compliance as referenced in Criterion 5(B)5 and how it relates to in situ sites considering there is no tailings impoundment. NRC staff understands this concern and will try to address this concern through a license condition.

6. Involvement with EPA or NRC regarding the evaporation ponds at Irigaray and Christensen with respect to Subpart W.

Discussion: NRC staff indicated there have been very limited discussions of Subpart W issues with EPA at this time.

No licensing decisions were made or agreed to by either party during this meeting.

PUBLIC DISCUSSION:

There were no members of the public in attendance.

ACTION ITEMS:

NRC will provide a detailed meeting summary of the issues discussed.
The meeting and teleconference ended at approximately 12:00 noon..
